

WINDOWS & DOORS

Misting or Fogging of sealed double glazed units in windows & doors are a common problem and generally occurs after your guarantee has passed! Misty or Foggy windows can make your view awful, but GMC Projects can easily replace the sealed units.

Broken window & door hinges, handles and single or multipoint locking mechanisms can be repaired or replaced. Our Fire Door Installation Service offers full installation of fire doors & doorsets, Installers Identification Plugs & Stickers as well as full written installation paperwork, all installed and certified to BM Trada Q Mark Fire Door Installers scheme.

FULL LOCKSMITH SERVICE/REPLACEMENT LOCKS & CYLINDERS

If you are moving premises, locked out or your keys have been lost or stolen, we can offer a non-destructive door entry service, change of locks or just the replacement of the lock cylinder, dependant on the type of lock you may have.
